## Marco Maran X3 Chair

Celebrated for designs that are light in spirit and flexible in application, Marco Maran achieves sculptural transparency in X3, an imaginative chair suited to both home and public spaces. Pioneering technology and materials, X3 is constructed of clear polycarbonate with a Desmopan® lattice; the chair's undulating profile and striking palette of glowing colors, punctuated by the structural grid, energize any environment. The result: a deceptively simple geometry that conveys a highly graphic effect.

X3 reflects the KnollStudio® commitment to timeless, enduring design, continuing the Knoll legacy of offering furniture to the exacting standards of the designer and affirming our unwavering belief in the power and utility of modern design.

*X3 is a playful expression of materials and form that pays homage to sculptor Harry Bertoia's iconic mid-century seating collection for Knoll.*
